

Serpentine Border Planting: Reflecting early Quakers journeys through the natural landscape, we bring the scale of the natural hederow down to a garden setting, planting species attractive to wildlife. Seasonal colour contrast, with flower, scent and berry. Planting will fed with composts and top mulched with bark chip all generated onsite.

Planting is in robust simple swathes with repeating punctuation groups drawing the eye along the border but retaining a restful feel. Seasonal variety with Evergreen and deciduous plants. Main species include: Buxus, Lonicera, Cornus, Sambucus, Philadelphus, Sedum, Nepeta Cotinus.

Esther Parkin Residence (see University Map for location)

Quaker Gardens Project
The Gazebo Hub
 Our home for the week.
 Here you'll be able to:

- Sign in for each day's work activities.
- View the website and displays.
- Fill in the questionnaire on your garden or burial ground and log it on the website.
- Donate to the garden project via cards, shirts, books and postcards.
- Meet and work alongside other Quaker gardeners and builders.
- Enjoy a cuppa and shelter from the sun or rain.

Approx Areas/volumes
 Dry borders 26m² 2m³ shingle
 Serpentine border 55m²
 therefore 3-5m³ topsoil/compost if possible + 5 m³ bark chip
